Core Skills

AI & AGENTIC SYSTEMS

Agent Skills Subagents MCP Servers
Multi-Agent AWS Bedrock
OpenAI · Anthropic LangChain · LangGraph
RAG · Vector DBs Generative & Streaming UI
AI Evals · Traces

FRONTEND ARCHITECTURE

Angular 2 → 21 Every 6-mo release
React 18 / 19 Next.js TypeScript
RxJS · NgRx · Signals Micro-Frontends
Module Federation Nx Monorepo

DESIGN SYSTEMS

Design Tokens Storybook Figma → Code
Web Components Stencil · Lit WCAG 2.2

PLATFORM & TOOLING

Node.js Vite · Webpack AWS · Lambda
Docker GitHub Actions Playwright
Jest · Cypress

CORE WEB

HTML5 CSS3 · SCSS Tailwind
JavaScript ES2024 D3.js Material Design

Languages

English Professional
Telugu Native
Hindi Conversational

PROFILE

Shipping AI agents and the intelligent frontends they live in.

AI & Agentic Systems Engineer building **agent skills**, **subagents** and **MCP servers** on AWS Bedrock, OpenAI & Anthropic — woven into production frontends, generative UI and design systems. Backed by 10+ years scaling Angular (v2 → v21) & React platforms for global enterprises and a UI/UX foundation that bridges product, design and infrastructure.

☆ Areas of Expertise

AI & Agentic Systems · primary focus

Agent skills · subagents · MCP servers · multi-agent orchestration · AWS Bedrock · OpenAI · Anthropic · RAG · streaming generative UI · evals & traces.

Frontend Architecture

Scalable Angular & React platforms · micro-frontends · module federation · performance budgets · governance.

Design Systems & Platform

Design tokens · Storybook · framework-agnostic primitives · DX tooling that compounds product velocity.

🏢 Professional Experience

AI & Agentic Systems Engineer · Frontend Architect

2022 — Present

Enterprise Product Engineering

- **Lead AI & agentic delivery** — supervisor + subagent architecture with portable **agent skills**, custom **MCP servers** and multi-agent orchestrations on AWS Bedrock; shipped 12 subagents, 8 MCP servers, streaming RAG (<800 ms first token) with end-to-end traces and evals.
- Lead frontend architecture for multi-team Angular & React platforms across an Nx monorepo with module federation.
- **Continuous Angular upgrade** — every major **v2 → v21** on the 6-month cadence, keeping platforms on the latest LTS and unlocking Signals, control flow, standalone components, deferred loading and SSR/Hydration as they shipped.
- Own design-systems strategy: tokens, primitives, Storybook, accessibility (WCAG 2.2) and adoption across product teams.
- Set frontend platform direction — DX, Vite/esbuild tooling, CI/CD, observability and Web Vitals budgets.

Agent Skills Subagents MCP Servers AWS Bedrock LangGraph Angular 2 → 21
React Nx Storybook

Senior Front End Developer

Dec 2016 — 2022

Ford — via Cognizant Technology Solutions

- Built customer-facing web platforms for Ford on Angular 2 → 14, adopting each new major release as it shipped, with RxJS and NgRx state management.
- Led shared component library work, introduced Storybook, and onboarded multiple feature teams onto the common frontend foundation.
- Drove performance hardening, lazy-loading strategies and visual regression tests, materially improving Web Vitals scores.
- Designed data-visualization modules with D3.js for analytics dashboards.

Angular 2 → 14 RxJS NgRx SCSS D3.js Storybook

Web Developer · UX/UI Designer

Dec 2014 — Dec 2016

Pearson Tutor Services & Cognizant Technology Solutions

- Delivered learner-facing tutoring experiences with deep focus on accessibility, theming and i18n; started as a UX/UI designer — the design DNA that still informs every architectural decision today.
